

Orienteering in the Sport-Centre – Guide

What's the goal?

Find **30 specific markers** shown as **red circles** on your map.

Each circle contains **one marker in the centre** — that's the one you need to find.

What do the markers look like?

- They are small **signs** (see example below).

- They are **placed high up**, for example on:
 - walls 
 - streetlamps 
 - trees 
 - Warning: There are **over 200 MAPICO markers** in the centre! Make sure you are **at the correct spot**.
-

What do you have to do?

1. Find the **correct marker inside each red circle**.
 2. Look carefully at the sign.
 3. **Write down the number you see on your answer sheet**.
 4. To help you, the **letter on the marker is already given** on your sheet — check that it matches.
-

Goal of the activity:

- Find all 30 markers
 - As quickly as possible!
 - But carefully!
-

Tips:

- Compare the **map with the real surroundings** carefully.
- Don't run randomly — **plan your route**.
- Always check the **correct number and letter**
